We will visit your home and inspect your plumbing system. This includes the kitchen, lavatory and laundry sink, faucets and drains. We will examine your outdoor faucets and valves. Each emergency shut off in your home will be identified and tagged as we inspect to make certain the valves are operable. We will check the water heater for proper ignition and operation. If there is anything amiss, we will identify it on a written report along with the cost to repair the problem. This inspection, over a \$100.00 value, is our gift to you. It is our way of saying **Thank You for being our customer.** We know that you have options and **we appreciate your business.**
